

The module has been built with sandwich panels (ST elements) developed and approved for the food industry. Rapid freezing is produced by the process of efficient cooling with a unique air circulation system, built into the module. Tunnel freezer can also be used as normal frozen storage (max. -30 °C).

## FINNCOLD COLD STORAGE FC-CV-40000

Product number **1104540000**

### Technical information

Size	13400 x 6400 x 3500
Capacity	2 x 36 euro pallets or 2 x 20.000 kg
Area of activity	+4 °C, FiLo
Frame	Self-supported, specially designed welded metal frame with 20 pcs supporting legs.
Weight	Total weight appr. 14.000 kg.
Cooling	Hermetic refrigeration compressor together with condenser and evaporator, refrigerant R449, cooling capacity of 18 kW (+4 °C / + 37 °C). A cooling evaporator coil electric defrost.
Air circulation	With propeller fans.
Control	Thermostat-controlled. Operating switches on the door frame.
Connection data	Electrical connection: 3 x 400 V / 36A  Drain connection, for condensation water.
